

Join the Consortium for Ocean Leadership

The Consortium for Ocean Leadership (COL) is the only community-based organization in Washington, D.C. working to ensure sound science underpins ocean policy and decision-making at the federal level. As the voice of the ocean science and technology community, COL is the trusted resource for policymakers seeking credible information about ocean challenges and opportunities, societal impacts, and science-based solutions. Because of its strong reputation, COL is able to magnify member institutions' ability to shape the future of ocean science and technology.

By joining COL, your institution adds its voice and expertise to a community of ocean science and technology leaders to ensure that ocean research and federal funding remain national priorities.

Benefits to COL membership:

- Amplify community influence on federal policy and investments in ocean research and infrastructure, technology development, and ocean science education
- Access COL expertise to strategize your federal agency and congressional visits
- Influence and shape the future direction of ocean science and technology
- Receive concise and timely analyses of federal legislation, policy, and funding issues, as well as guidance from COL on how you can influence these
- Participate in COL-convened meetings and congressional events that bring together our members with federal officials and other stakeholders to explore emerging research challenges and opportunities
- Guide COL member services, its research, and education programs
- Exchange experience and advice with other leaders in the ocean community
