February 15, 2018

The Honorable Paul Ryan  
Speaker of the House  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Nancy Pelosi  
Democratic Leader  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Thad Cochran  
Chairman  
Appropriations Committee  
U.S. Senate  
Washington, DC 20510

The Honorable Rodney Frelinghuysen  
Chairman  
Appropriations Committee  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Mitch McConnell  
Majority Leader  
U.S. Senate  
Washington, DC 20510

The Honorable Charles Schumer  
Democratic Leader  
U.S. Senate  
Washington, DC 20510

The Honorable Patrick Leahy  
Vice Chairman  
Appropriations Committee  
U.S. Senate  
Washington, DC 20510

The Honorable Nita Lowey  
Ranking Member  
Appropriations Committee  
U.S. House of Representatives  
Washington, DC 20515

Dear Speaker Ryan, Leaders McConnell, Pelosi and Schumer, Chairman Cochran and Frelinghuysen and Vice Chairman Leahy and Ranking Member Lowey:

The undersigned are writing to thank you for the pivotal role you and your staff members played in securing a budget agreement to raise the spending caps for Fiscal Years 2018 and 2019. We recognize the challenges entailed in negotiating and securing passage of this agreement, and are grateful for your commitment to succeeding in this effort on behalf of the American people.

As you determine 302(b) allocations for the appropriations subcommittees, we urge you to empower robust funding increases for the federal agencies that fuel and conduct research and development (R&D). Whether the objective is to stoke the engine of our economy, confront threats to the health and safety of Americans, or forge a path to long-term fiscal stability, strengthening investments in R&D will generate crucial returns to our nation.

The National Science Foundation (NSF), Department of Energy (DOE), Department of the Interior (DOI), National Institute of Standards and Technology (NIST), National Oceanographic and Atmospheric Administration (NOAA), Department of Agriculture (USDA), Department of Defense (DOD), National Institutes of Health (NIH), National Aeronautics and Space Administration (NASA) and our nation’s other science departments and agencies support the research necessary to fuel innovation, monitor threats, respond to and overcome disease, and advance other crucial American priorities. Failing to fund the precommercial and noncommercial investment that has been foundational to our nation’s security and prosperity places our nation at a growing disadvantage in the global arena, a hazardous path that we can and must avoid.
Over the past decade, America’s global leadership in science and innovation has steadily slipped. In 2000, the U.S. ranked 4th in percentage of gross domestic product (GDP) invested into R&D. In 2014, the U.S. ranking fell to 41st, with countries like China, Russia and Korea ramping up investments into R&D and surpassing the U.S. This and other key indicators sound an alarm that our nation must heed. As esteemed leaders of the House, Senate and Appropriations Committees, you will be instrumental in determining whether, going forward, our nation leverages R&D or sidelines it. We believe the latter path spirals downward; please put U.S. R&D to work for the betterment of our nation and global community.

Thank you for considering our views, and for your service to our nation.

Sincerely,

Stefano Bertuzzi, Chief Executive Officer, The American Society for Microbiology
Allyson K. Anderson Book, Executive Director, American Geosciences Institute
Sarah Brookhart, Executive Director, Association for Psychological Science
Thomas Connelly Jr., Executive Director/Chief Executive Officer, American Chemical Society
Christopher Fox, Executive Director, American Association for Dental Research
